A CHALLENGE.

Figaro — It was Paul de Cassagnac who wrote to Victor Noir: "I am the offended pariy; I have the choice of weapons. I choose the French grammar. You are dead."

FINISH THE JOD

New York Press.—Having closed part of the mills and shops of the country. Democratic Free traders now argue that it is a good time to make the job complete. The blame can be thrown on that poor old scapegoat, the Sherman Law.

SHOWING THE VALUE OF TACT snowing the value of tact.

Ohicago Inter Ocean.—"For Heaven's sake, look at the dark man across by the punch bowl!" said one lady to another at a reception. "He has drunk twelve glasses of punch, one after another!"

"Ab, indeed?" said the other, dryly."

"that is my husband."

"that is my husband."
But the woman born to tact and luck feil on her feet. "Is it possible? Let me congratulate you, lucky woman, for having a husband able to drink tweive glasses of punch without growing tipsy. Why, if my husband drinks two he gets simply roaring. You fortunate thing, how I envy you!"

EX-GOVERNOR CAMPBELL ON M'KINLEY

EX-GOVERNOR CAMPBELL ON M'XINLEY. Intervineer.—I asked ex-Governor Campbell, the late Democratic Governor of Ohio, who is now living in New York, if he thought Neal would defeat Governor McKinley for Governor of Ohio this fall. "Do you think this a good year for Democrats to run? Neal is a good man, but he has got an uphill fight on his hands. The business depressions cannot fall to lajure the party in power, as the tendency of the public is to hold the party in power responsible for everything that happens, even down to the weather."

END THIS DEADLY FOLLY!

New York Press.—Stop the miserable sham economy that refuses appropriations sufficient to keep our seacoast life saving stations manned the year around! In the recent hurricane (wenty-four men wer drowned on a ten mile stretch of New Jersey coast, with four unoccupied life saving stations within warning distance. If Congress had done its duty there lives might have been saved. The tuterly discredited theory that dangerous storms do not occur between May 1st and September 1st should be abandoned. The Linted States Government cannot afford to be niggardly in a great work of humanity. Keep the stations manned and ready for service twelve mouths in it eyear.

INCREASED DUTY ON SUGAR

New York Press.—While prating about the reduction of "Tariff taxes" about the first thing the Democratic party will do is to take sugar off the free list and make it dutable again. The Republicans gave the American workingman first free tea and coffee and then free sugar. In abort, a free breakfast table, a luxury, by the way, the British workman has never enjoyed under the benign influence of Free-trade. The shaky conditions of the revenues, with an alarming deficit to provide for, will make it doubly difficult to reduce the Tariff and increase the revenues at the same time. The general properties of the people never appreciated the benefits of the measure. When sugar is restored to the dutiable list and the cost increased (for home competition amounts to little or nothing) every househould will realize the difference, especially in these times of low wages and fack of employment.

STATE BANKS

FIATE BANKS.

Commercial Gassite.—Mr. Cleveland's idea that state banks would be secure if placed under Federal supervision, as are National banks. Is attractive enough as far as it goes, but the weakness of it is that it does not go far enough. Federal supervision of National banks, through the medium of occasional examinations by Federal officials, is not that which has made them secure. It would be a difficult matter for anybody short of an army of Examiners to thoroughly supervise and safe-guard the operations of the wast number of banks what would spring up if the tax on state banks were repeated. Perhaps it is Mr. Cleveland's idea to splange the areas of "spolls" by adding an army of Examiners to the already over-burdened pay roll to Uncle Sam. The country does not need state banks, and will not have them under any circumstances. The wreeks they created once have not been forgotten, for evidences of them still strew the shores of recollection of all men whose years of fife number fifty.

A FROTECTIVE Tariff declares that the manufacturing of commodifies shall be confined to the country where the demand for sapply exists, and that no foreign country shall be permitted to send its products into this country to compete with its own products. Applied to the United States, if means that the under paid labor of Europe and Asia shall not make articles which may come into our ports, unless the persons manufacturing them shall pay for the privilege. This paying for the privilege. This paying for the privilege is cailed paying a Tariff: and whether the products in question shall be in the raw or finished state, the Tariff shall be paid if they are articles similar to those that we can make or produce ourselves.

In urging a revival of the income tax to make good "the deficit in our reve nues when we reduce the customs duties," The Atlanta Constitution says:

to make good "the denett in our revenues when we reduce the customs duties,"
The Atlanta Constitution says:
When we consider the tremendous drain upon the people for a generation in the shape of a 80 per cent. Tailf, Federa's seen that the income tax would afford a greater degree of relief than any other one thing could give.

It is such demagogic utterances that have tricked ignorant and thoughties voters into making war upon their own welfare. No tax whatever, says The New Tork Press, is laid for Federal pension and other expenses," as this Bourbon Free-trade organ intimates. Fractically the whole income of the National Government is derived from Tariff duties and internal revenue taxes, a fact any common school child should know by this time. The greater part of tie-Federal pensions, but of these receipts are paid, not outy Federal pensions, but of the services of the National debt.

The statement that Federal pensions have been a "train" upon the people for a "generation" is too ridiculous for serious controversy. No patriotic citizen believes them to be a "train" to-day, especially when the rise in wages and fall in prices that have occurred in the last thirty years are taken into consideration. The money paid for pensions goes at once into every nook and corner of the land. It is promptly disdustred by the pensioners to merchants of every kind, and it plays a very important part in stimulating and developing domestic trade.

An income tax, however, would be a "virian" that would be felt in every work and corner of the internal that would be felt in every selections.

An income fax, however, would be a "drain" that would be felt in every section of the country. It would be putting a penalty on thrift and industry. It would punish success and restrict enterprise. It is odious, inquisitorial and un-American.
